

The 11th Japan-Korea Liver Symposium

Date: June 8 (Sun), 2014, 9:00–12:00

Place: Kyoto International Conference Center; 1F Room 103

Takaragaike, Sakyo-ku, Kyoto 606-0001 Japan Phone 81-75-705-1229 Fax 81-75-705-1100

Theme: “**Hepatitis and hepatocellular Carcinoma; Update in 2014**”

【Japan】

1. “Sequential therapy with a nucleoside analogue followed by interferon in Japanese patients with chronic hepatitis B virus infection.”
Masaru Enomoto (Osaka City University)
2. “The monitoring of serum CK-18 levels reflect the histologic activity score of NAFLD.”
Miwa Kawanaka (Kawasaki Medical University)
3. “The HBx mutation was associated with human hepatocellular carcinoma and enhanced the tumorigenesis through the activation of JNK and Wnt pathways.”
Satoru Hagiwara (Kinki University)
4. “Exploring Stemness of Hepatocellular Carcinoma.”
Taro Yamashita (Kanazawa University)

【Korea】

1. “Identification of novel microRNAs related to HCC in mouse model.”
Do-Young Kim (Yonsei University)
2. “Application of controlled attenuation parameter in patients with NAFLD.”
Young-Eun Chon (Yonsei University)
3. “Effects of genomic changes in hepatitis B virus on the development of hepatocellular carcinoma.”
Dan-Bi Lee (Ulsan University)
4. “Identification of a stem cell-like gene expression trait in hepatocellular carcinoma.”
Yoon-Jun Kim (Seoul National University)

Organizing Committee

Korea: Kwang Hyub Han (Yonsei University), Young Hwa Chung (Ulsan University), Hyo Suk Lee (Seoul National University)

Japan: Okio Hino (Juntendo University), Masatoshi Kudo (Kinki University), Soo Ryang Kim (Kobe Asahi Hospital)

JKLS Secretariat
